About Me

Nuclear Engineering student interested in reactor monitoring systems, control systems, embedded systems, and the intersection of nuclear engineering with machine learning. Experienced with several programming languages including PYTHON, C, and SQL. Aiming to pursue graduate studies and research combining nuclear engineering with AI-driven monitoring systems.

Education

Hacettepe University 2025 – Present
B.Sc. in Nuclear Energy Engineering *Ankara, Turkey*

- GPA: 2.30 / 4.00
- Relevant coursework: Reactor Physics, Thermal-Hydraulics, ...

Ankara Atatürk Lisesi 2021 – 2025
96.71/100 (Science Track) *Ankara, Turkey*

Projects

Self-Monitoring Reactor Surveillance System 2026
TEKNOFEST Nuclear Energy Technologies Design Competition

- Developed a point-kinetics reactor physics model and sensor simulator.
- Designed a monitoring core combining a physics-based model with ML-based anomaly detection.
- Tools used: Python, SciPy, (ML library), web-based dashboard.

Project Name 20XX
Brief description / context

- Contribution 1.
- Contribution 2.

Technical Skills

- **Programming:** Python, C/C++, Arduino, SQL
- **Libraries/Tools:** NumPy, Pandas, SciPy, PyQt5, Git, PyTorch, scikit-learn, TensorFlow, Matplotlib, Keras
- **Domain knowledge:** Embedded systems, neural networks machine learning

Certifications & Courses

- Certificate / course name – Institution, Year

Languages

- Turkish (Native), English (Advanced), Russian(intermediate), German(Currently Learning)
