

CERTIFICATE OF COMPLETION

This is to certify that

Ada ŞAHİN

has completed an on-line e-learning course on

Categorization of Nuclear Material

on the IAEA's Learning Management System

Content version: **1.00**

Language: **English**

Certificate ID: **i8pG6yPWD6**

Issue date: **26 June 2026**

This e-learning is based on IAEA publications and training materials. Please note that the IAEA is not an accredited educational organization and the user's identity was neither verified throughout the learning process nor the assessment. The certificate ID is unique and is registered in the IAEA's Cyber Learning Platform.

Categorization of Nuclear Material

Subtopics

1. What is nuclear material?
2. Categorization of nuclear material
3. Aggregation of nuclear material
4. Scenario
5. Application of categorization in nuclear security

Learning Objectives

- 1.1 Recall the key concepts and steps of the nuclear fuel cycle.
- 1.2 Define nuclear material according to the IAEA Statute, the CPPNM, IAEA Nuclear Security Series No. 20, No. 13 and No. 14.
- 1.3 Describe uranium ore concentrate in relation to the definition of nuclear material.
- 2.1 Recognize the importance of categorizing nuclear material.
- 2.2 Describe the contents of the categorization table in NSS No.13.
- 2.3 Recall the special considerations in the categorization table in NSS No.13.
- 2.4 Use the categorization table to correctly categorize nuclear material.
- 3.1 Explain why nuclear material aggregation is important.
- 3.2 Recall the two approaches for aggregating nuclear material.
- 3.3 Recall which publications explain the nuclear material aggregation formulas.
- 3.4 Apply aggregation formulas to correctly aggregate nuclear material.
- 5.1 Recall how nuclear facilities use defined protection areas for different categories of nuclear material.
- 5.2 Describe how categorization impacts transport security.
